Universal Pneumatic Coil Spring Compressors

A truly universal, pneumatically operated coil spring compressor, for MacPherson strut type suspension systems.

- ✦ The compression force of 1600kg (standard model) or 2200kg (heavy-duty model), provides sufficient power to cover most known standard production cars and/or LCV's.
- ✦ Suitable for both left and right handed wound standard springs, and covers all types of springs e.g. Conical, Banana type, High Compression, Coil Over Damper and LH wound springs, without the need for costly accessories such as additional jaws or clamps. It can also be used on vehicles with aftermarket spring conversions, due to the extra-long stroke of the pneumatic cylinder.
- ✦ The spring compressors also feature fully adjustable spring clamps, which can be used directly on the springs or on the top and bottom mounts - triple spring clamp mechanisms are fitted for added safety. Safety is also ensured by the safety valves fitted on the cage doors, to ensure the spring compressors cannot be operated with the cage doors in the open position.

Engineered Acetyl Jack Pads for Tesla

A set of 4 lifting jack pads designed to help prevent any damage to the bodywork or battery case on Tesla Models when lifting the vehicle using either a floor jack or a 2 post ramp.

Pushed directly into the lifting points on the underside of the vehicle, the rubber O-ring holds the pad in place whilst the jack or ramp is then raised up to the pad, with the rubber collar helping to both identify their location under the car and to act as a grip to help remove the pad from the vehicle after use.

- Suitable for use with a lift pad of at least 70mm (2 3/4").
- Manufactured from non-compressible and non-marring Acetyl plastic, with a rubber O-ring.
- Individual jack pads available.
